## DATA ANALYSIS AND INTERPRETATION

### TABLEAU - INTELLIGENT CRICKET

- Analysed **Denmark Cricket team** for ICC World Cup Qualifiers 2024 over 20-over game split into powerplay, middle, and death phases.
- Provided **critical insights** into scoring/defending patterns of the team and batting and bowling performance in each phase.
- Assessed **player performance statistics** revealing pointers on strategies for **Denmark to maximise win potential** against strong opponents like Ireland and Scotland.

### TABLEAU - ENGLAND FUTSAL

- Implemented **insightful and easy to read charts** in Tableau.
- Improved **communication and enhanced** decision-making process

### POWERBI - CHELTENHAM TOWN FOOTBALL CLUB ACADEMY

- Accelerated **attacking play** by identifying players having more successful passes and ball receives in the final third.
- Compared **passing accuracy**, entries in the final third against different oppositions.

### EXCEL - CHELTENHAM TOWN FIRST TEAM

- Generated **user-friendly and interactive dashboard** showcasing team's attacking and defending relative performance to other teams.
- Dashboard facilitated swift **data-driven decisions** to finetune game strategies and **identify areas of strength and weakness**.

## VIDEO ANALYSIS SOFTWARES

### NACSPORT - COURSE PROJECT, UNIVERSITY TEAMS

- Led **analysis** of Futsal World Cup 2021 demonstrating **strategic thinking** through own code window to study crucial game instances.
- Developed **alternate solutions to solve the problem** of collecting data on playing styles.
- Added Telestrations using **Klipdraw** and **Graphic descriptors** to **simplify complex information** and presented findings using **Nacsport Dashboards** to enhance visualisation.

### DARTFISH - CHELTENHAM TOWN ACADEMY

- Captured real-time** video clips covering specific actions of each player and KPIs according to the coach's needs.
- Responsible for **packing analysis** focusing on passes, line-breaking passes, and entries into the final third and penalty area.

## PYTHON AND SQL

- Analysed matchups between **AB De Villiers Vs Jasprit Bumrah**, Virat Kohli Vs Sachin Tendulkar in ODIs, **L.Messi Vs C.Ronaldo**.
- Executed python scripts on **Web data** from online analytic sites.
- Imported the data into **MySQL Workbench** to maintain a **database** for storing the data. Connected Jupyter Notebook to MySQL database using **Python Libraries** like **PyMySQL**.
- Loaded data into **Panda DataFrames** for manipulating and analysing the data. A **scatter plot** using **Matplotlib** was built for illustrations.
